The Exhibition

4th International Exhibition

ENERGY- PHOTOVOLTAIC '09

*Your place for successful deals in the market of
Photovoltaic and Renewable Energy Sources*

The Exhibition, all the years, managed to score the most considerable firms in the sectors of Photovoltaic and R.E.S. Its progress, every year, brings the Fair in the first place in Greece, as the Key - Exhibition for Photovoltaic Systems and Renewable Energy Sources.

In 2008 the Exhibition **ENERGY - PHOTOVOLTAIC '08**, has been internationally established as the biggest and most successful in Greece.

With 200 exhibitors, from 15 countries and approximately 11.000 visitors, was the professional meeting place for many and successful deals and for better professional contacts between exhibitors and visitors.

The Exhibition **ENERGY PHOTOVOLTAIC**, with it's annual success, is the platform for gainful co-operations, giving to the exhibitors the advantage of promoting their products and services in an excellent organization.

Opening Ceremony 2008, Photo (from left to right): Managing Director LeaderExpo Mr. Christopher Papadiotis, Greek Minister of Development Mr. Christos Folias, CEO, PPC Renewables S.A. Mr. Anastasios Garis, German Ambassador Dr. Wolfgang Schultheiss.

Today the **International exhibition**

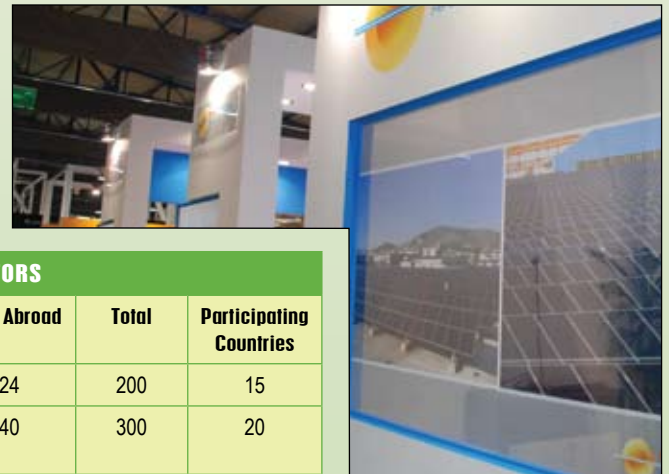

ENERGY- PHOTOVOLTAIC '09

- is the most well known and successful Greek fair in Greece and Europe for the Photovoltaic systems and Renewable Energy Sources,
- the exhibitors and visitors know that it constitutes the **professional place** for successful business contacts.

DETAILED STATISTICS OF 3rd INTERNATIONAL EXHIBITION "ENERGY-PHOTOVOLTAIC 2008"

EXHIBITION AREA			
Exhibition area	Domestic exhibitors	Foreign Exhibitors	TOTAL
14.000 sq.m.	9.000 sq.m.	4.800 sq.m.	13.800 sq.m.
Open area	600 sq.m.		600 sq.m.

EXHIBITORS				
Exhibitors with their own stand	German Companies	From Abroad	Total	Participating Countries
140	36	24	200	15
Additional represented companies	260	40	300	20

VISITORS			
	Domestic	Foreign	Total
Trade visitors	8.500	1.000	9.500
Public	2.000		
Total	10.500	1.000	11.500

Visitors from the countries: Greece, USA, , Germany, China, Spain, Canada, Italy, Bulgaria, Austria, Czech Rep., Netherlands, Belgium, India, Cyprus, Switzerland, France, Canada, Turkey, UK, Russia, Malta.

COMMENTS FROM OFFICIALS

The **Greek Minister of Development, Mr. Christos Folias**, stated: "The International Exhibition ENERGY-PHOTOVOLTAIC has become an institution in the energy market of our country, as it has been organized for the third consecutive year. This year, the 3rd International Exhibition "ENERGY 2008", considerably bigger than last years, with exhibitors participating from 12 countries, became a point of reference for our country's energy market. Congratulations to the organizers".

The **German Ambassador in Greece, Dr. Wolfgang Schultheiss**, in his short speech pointed out that: "The International Exhibition ENERGY-PHOTOVOLTAIC 2008, dedicated to renewable energy sources and energy efficiency, belongs among the outstanding events which took place this year in Greece. This year, as well as the two previous years, more than 20 German companies participate of, in the exhibition. Moreover, this year, for the first time, there was a stand from the Federal Ministry of Economy and Technology giving a unique opportunity to visitors to get informed on the latest technological developments in Germany and listen to speeches from well-known experts in the energy sector.

The **Chief Executive Officer of the Center of Research and Technology Manufacturing of China, Mr. Chen Yiming**, mentioned that: "Such high quality organisations contribute to the combat against climate change at an international level, and I wish every success to the biggest Exhibition and Conference on renewable energy sources in Greece".

The Exhibitors

With its successful course the International Exhibition **ENERGY – PHOTOVOLTAIC**, reflects its progress in the developing market of Photovoltaic and R.E.S. in Greece.

The most exhibitors belong to the group of the “big players” in the Greek and International energy market. The quality and the big number of visitors, as well as the high level of competition, offers to the exhibitors and visitors the excellent opportunity to have successful deals and to develop new and dynamic deals.

In the Exhibition will participate producers, representatives and companies dealing with solar and wind energy, materials and elements, solar systems, wind generators, as well as with geothermal, biomass and hydroelectricity. Also, companies of marketing, installations, consulting, energy saving and eco build.

EXHIBITS

PHOTOVOLTAIC SYSTEMS

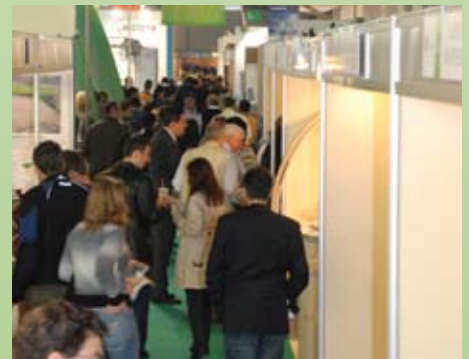

- PV Parks Installations
- PV Systems Installations
- PV Systems (Modules -Solar Cells-Thin-film modules)
- Inverters
- Charge Controllers
- Batteries
- Mounting Systems
- Solar tracking systems
- Connection boxes
- Cables and component parts
- Monitoring Systems
- Co-ogeneration
- Installations
- Planning
- Service

RENEWABLE ENERGY SOURCES

- Solar energy
- Wind Energy
- Thermal solar systems
- Geothermal Energy Systems
- Biomass - Hydropower
- Power fuel cells Natural Gas
- Saving energy systems
- Installations & Energy
- Production from R.E.S.
- Management energy systems
- Equipment supplies

ECO BUILDING

- Architectural Planning
- Bioclimatic construction of energy efficient buildings
- Smart buildings
- Building Energy Management Systems (B.E.M.S.)
- Automations
- Eco-building materials
- Aluminium constructions
- Energy saving building shells
- Energy-saving glasses
- A/C Systems from R.E.S.
- Industrial energy systems and installations
- Green energy and Natural Gas

The Visitors

The visitors of the exhibition are, every year, many thousands from Greece and abroad that invest, apply and use PV systems and Renewable Energy Sources. The visitors comes from Greece, USA, Germany, China, Spain, Canada, Italy, Bulgaria, Austria, Czech Rep., The Netherlands, Belgium, India, Cyprus, Switzerland, France, Canada, Turkey, UK, Russia, Malta.

The visitors of the Exhibition deals with:

- Investments in R.E.S.
- Production of Energy from PV, and Wind Parks, Geothermics, Biomass and Hydroelectricity
- Management and saving energy
- Consulting and installations
- Technical and construction companies
- Cooling and heating from R.E.S
- Electromechanical material and Automatisms
- Instruments and equipment for energy production
- Local Government Agencies, Public Social Sectors
- Executives from: Industries - Shipping
- Enterprises - Hotels - Hospitals
- Architects - Engineers - Electricians -
- Mechanical engineers - Chemists - Geologists
- Enterprises of rural sector
- Remaining categories

Opening Hours

The entrance at the Exhibition for professionals and public is free of charge with registration at the Reception.

Free parking for 6.000 cars.

Thursday	22 October	14:00-20:00
Friday	23 October	10:00-20:00
Saturday	24 October	10:00-20:00
Sunday	25 October	10:00-20:00

4th International Conference ENERTECH 2009

During the Exhibition will take place also the 4th International Conference "ENERTECH 2009" by the Scientific Organization of the GREEK PUBLIC POWER CORPORATION S.A. (PPC S.A.). The recent developments in the energy sector and mainly in the oil market, the security of energy supply, the continuously increasing needs of modern societies for energy and at the same time the environmental repercussions of the greenhouse effect, have raised many questions and created a lot of concerns.

TOPICS

Renewable Energy Sources (RES) constitute the most promising solution for the confrontation of these problems, offering clean and inexhaustible energy and contributing to energy independence. Additionally, New Energy Efficiency (EE) technologies decrease energy demand offering both economic profits and environmental benefits. The Conference aims at bringing together researchers, policy makers, energy sector decision makers, academics, members of funding institutions, government officials, interested in current developments & perspectives in the energy sector and in particular will include topics related to Renewable Energy Sources, Energy Efficiency and Energy Management.

BUSINESS FORUM

During the Conference, at the BUSINESS FORUM MEETING, the exhibitors can have their own presentation, to all attendants, for their products, services and projects. At the Business Forum, are invited investors, government officials, policy makers, decision makers, exhibitors and big Greek companies which invest in the R.E.S. sector.

PROMOTION PROGRAM

The 4th International exhibition ENERGY-PHOTOVOLTAIC 2009 is supported by a very strong promotional program as follow:

- **PRESS:** Well known magazines in Greece and in Europe
- **TV & RADIO:** TV and Radio Spots before and during the Exhibition
- **OUTDOOR PROMOTION:** Road's Promotional Banners, Printed Invitations to the market
- **BUSINESS SITES:** In Greece and abroad
- **MASSIVE MAILING:** Electronic Media in Greece and abroad.
