

SUN & WIND ENERGY: Greece special

Since the beginning of 2009 Greece has subsidised photovoltaics generously and passed a law for its promotion - the corresponding licenses are in great demand. In a comprehensive special SUN & WIND ENERGY explores the southern European country in detail and explains the general framework and structure of the Greek PV market. Besides a close look at the political, economic and legal situation, the means of entering the Greek solar market are highlighted.

Greece is already one of the most successful countries in the field of solar thermal energy - time to find out about the chances of the photovoltaic industry.

The SUN & WIND ENERGY Special edition Greece will be launched during the international solar technology trade fair „Intersolar“ in Munich (May 27-29) and will be published in the SUN & WIND ENERGY issue 6/2009 on June 2.

9,000 off-prints are distributed especially in Greece and at important exhibitions like the Energy Photovoltaic '09 in Athen.

SUN & WIND ENERGY is the unique forum for experts on renewable energies that informs about 25,000 professionals worldwide about the top-themes of the branch. Generally featured in the international magazine are market overviews, world maps, product information, statistics, prospects and exclusive company profiles, all within the fields of solar thermal, photovoltaics, wind energy and biomass. Besides receiving the latest news, the reader is able to benefit from additional offerings such as an exhibition calendar and a branch directory.
