Upsolar receives "very good" from German Öko-Test magazine

Following the independent testing results of the German magazine Öko-Test (April 2010), China based Upsolar was rated "very good" among 15 international solar photovoltaic suppliers.

Only 4 companies obtained a "very good" rating, and Upsolar was the only one of 7 Chinese companies to achieve this. This is major achievement for Upsolar and reflects the quality of its products.

Upsolar ramp up to higher efficiency

Following the trends in the PV industry which always tend to propose higher power outputs, Upsolar is now extending its power range for their monocrystalline series.

Standard 72 cells (UP-MM series) are now available from 165Wp to 195Wp.

At the same time, Upsolar's Black Series will now widen their output range from 160Wp to 190Wp.
